The agenda was approved as presented. The agenda is Attachment 1.

4. APPOINTMENT OF DRAFTING COMMITTEE

In compliance with the ISO requirement to appoint a drafting committee, SC 13 resolved that Ms. Linda Kezer, in support of the SC 13 Secretariat, would be responsible for drafting and distributing the meeting minutes.

5. REPORT OF THE SC-13 SECRETARIAT

Mr. Kelley presented the Secretariat's report. The minutes of the June 2000 meeting were approved with one change. Mr. Hara requested that "NASDA have approved DIS17433" be corrected to read "ISO/TC20/SC13 National Committee of Japan has approved DIS 17433" (page 5 of draft minutes).

The status of Action Items was reviewed. All action items were CLOSED. The action items are in Attachment 2.

The Program of Work was approved as submitted. It was noted that seven SC13 documents had attained IS status since the June meeting:

(Four SCPS, Lossless Compression, Reference Environment, and EAST)

The remainder of the Secretariat's report is in Attachment 3.

6. REPORT OF DELEGATES REGARDING ACTIVITY RELATING TO SC 13

BRAZIL Dr. Eduardo Bergamini presented the Brazil report. He showed ABNT activity relative to TC20 inputs. Notably, ABNT seeks to append associated Green Books to each basic standard. He listed the documents being translated into Portuguese. He presented the ABNT Home page of the Brazilian Information Network for the Standardization of Space Activities (RBNAE) and reviewed the approval procedure by which SC13 Standards become ABNT standards. Importantly, he stated that all CCSDS Recommendations are becoming ABNT standards. His presentation is Attachment 4.

CANADA There was no representative from Canada and no report.

CHINA Mr. Qian Xiaolian presented the China report. He reported that CASI had approved three draft international standards: ISO/FDIS 15887, 15888 and 15889. He reported that CASI has increased their efforts to promote the CCSDS and SC 13 standards with China aerospace industry. A plan is being implemented for the purpose of compatibility with CCSDS and SC 13 standards, thereby, adopting these international standards. He reported that CASI and CAST has begun work on

emphasizing the research work of CCSDS and SC13 in an effort to begin working with the preparation of these standards. His report is Attachment 5.

FRANCE Mr. Forestier presented this report. He indicated that CNES is involved with both the CCSDS and ISO reviews of our documents. He showed which spacecraft and ground facilities are using CCSDS products. Mr. Forestier listed the documents which have/are being translated into French, but noted that delays in obtaining French translations do not delay ISO's processing of CCSDS documents. Mr. Ivarnez commented that they have a resource problem with verifying the technical translations. Mr. Forestier's report is Attachment 6.

GERMANY Mr. Drexler indicated that DLR has no report since there has been little activity in this area. He did mention that DLR is trying to get activities under way to make Weilheim CCSDS compatible.

ITALY Mr. Donati indicated that ASI did not have a report.

JAPAN Mr. Hara showed the status of documents under review. He also provided responses to the Action Items. He indicated that NASDA has not received Appendix A of the Strategic Plan. He noted a personnel change on the NASDA representative to SC-13. (The Secretary will notify ISO of this change as well as change the SC-13 database.) Mr. Hara's report is Attachment 7.

RUSSIA There was no representative from Russia and no report.

UNITED KINGDOM Dr. Allan reported that BSI has indicated that, in the future, it will adopt ISO standards "as is," making no changes to the document number. He showed the numerous CCSDS-related areas in which BNSC is involved and listed the CCSDS documents that have been adopted as BSI standards. He stated that ACE/68 tracks SC14 and ECSS activities. Dr. Allan's report is Attachment 8.

UNITED STATES Mr. Hooke reported on US activity, noting that the comments received from the ISO review of the OAIS Reference Model have already been provided to CCSDS Panel 2 for disposition. He expressed concern that a US International Traffic and Arms Regulation may severely limit our ability to function internationally. He also commented that there is an increasing interest by the US military community in the CCSDS recommendations. We need to determine a forum in which the communities can work together. Mr. Hooke's report is Attachment 9.

7. REPORT OF DELEGATES REGARDING SC13 LIAISON ACTIVITIES

Ms. Kezer discussed the number of MC Resolutions that have been adopted relative to progressing documents to ISO. Some of these related to completed documents (Blue Books) while others relate to documents under development within CCSDS (Red Books). Mr. Ivarnez indicated that SC-13 has no objection to documents still under development within CCSDS being submitted to ISO as Draft International Standards (DIS).

8. CONSIDERATION OF NEW PROJECTS/ENDORSEMENT OF EXISTING STANDARDS FROM NON-ISO BODIES

There were no items presented.

9. ANY OTHER BUSINESS

Revisions to SC-13 Strategic Plan. There were no comments made to the new ISO Strategic Plan, which previously had been distributed by the Secretary.

Consideration of new ISO Technical Committee. Mr. Stephens noted that SC-14 had terminated their plans to withdraw from TC20 and establish a new Technical Committee. He did not know the reason for this action and had hoped Mr. Bastikar would have been present to explain this decision.

During this discussion, it was agreed that a joint meeting between SC-13 and (at least parts of) SC-14. Accordingly, the Secretary was tasked to contact the SC-14 Secretary for the purpose of determining areas of joint interest (both technical and administrative) in order that a draft agenda for a joint meeting could be developed.

10. REQUIREMENTS CONCERNING A SUBSEQUENT MEETING

The next SC13 meeting was set for June 7, 2001 (PM) at RAL to be contiguous with the CCSDS Management Council meeting of June 6-7, 2001.

11. APPROVAL OF RESOLUTIONS

Ms. Kezer itemized the Resolutions taken during the meeting together with the one Action Item. These were approved.

12. ADJOURN

Mr. Forestier adjourned the meeting at 1330.

REPORT FROM CHINA

China Report to ISO/TC20/SC13 ?

Dec.30, 2000

1.Support and take an active part in sc13 activities

For a year, CASI has organized chinese experts to discuss draft standards distributed by the secretariat of ISO and made suggestions for revision of china. Approved by CAS (China Association for Standardization), we have replied following draft international standards.

ISO/FDIS 15887 : Space data and information transfer systems-Data systems-Lossless data compression

ISO/FDIS 15888:Space data and information transfer systems-Standard formatted data units-Referencing environment

ISO/FDIS 15889 : Space data and information transfer System-Data description language-EAST specification.

2.Apply on CCSDS and SC13 standards

As a p-member represented china, CASI has paid more attention to tracking SC13 standards, sent interested agencies to attend meeting held by CCSDS and SC13, reviewed, evaluated and voted for draft international standards of SC13. CASI organize specialists to track and study other documents of CCSDS and SC13. Our purpose is strengthen international co-operation, learn from advanced international technology and experiences, raise china's telemetry and command technology, and approach the international standards. CASI has done a lot of propaganda work to promote international standards in china aerospace industry as well. We are ready to implement CCSDS and SC13 standards. At the same time,« CCSDS Standard Space Data System Research Plan» prepared by CAST is under implementing for the purpose to compatible with CCSDS and SC13 international standards. All this gives china a good chance to adopt CCSDS and SC13 international Standards.?

3.Emphasise the research work of CCSDS and SC13 standards

In addition to the above work we have done, CASI and CAST is trying hard to study CCSDS and SC13 standards and participate in

REPORT FROM THE UNITED KINGDOM

United Kingdom report to ISO TC20/SC13, November 2000

P Allan, 24 November 2000

Management***Organization / Changes***

The work of the British Standards Institute (BSi) ACE/67 (Aerospace Committee for Engineering 67) Committee for Information Transfer Standards has continued its work in reviewing the drafts, DIS and FDIS documents from SC13. A similar committee (ACE/68) tracks the work of SC14 and P. Allan, the chairman of ACE/67, attends some of the ACE/68 meetings. An Electronic Document system has been adopted for both ACE/67 and 68 and it is intended that it will become the sole means of distributing documents in the near future.

BSi are proposing that in the future, they will not take ISO standards and make them into British Standards and that people should use the ISO standards themselves. Since all that BSi effectively does to the document to generate the current British Standard from an ISO one is to add a front sheet; there is a logical argument for this change. More importantly, however, BSi does make comments on the draft ISO standards, and this will need to continue in the future.

Areas of Agency Involvement

Funding for these activities is provided jointly by BNSC and the two relevant UK research councils, PPARC and NERC

Manpower Allotted

The manpower allotted to this area is mixed in with the funding provided to support CCSDS activities. The total funding amounts to approximately half a staff-year, although only a small part of this goes directly to SC13 and ACE/67 activities.

Implementation Activities***Spacecraft Utilizing SC13 Standards***

ACE
STRV

Ground Facilities Utilizing SC13 Standards

RAL ground station
DERA ground station
Surrey Satellites Ltd

The above do use all of the available standards, although the usage is increasing with time.

Documentation Activities

All of the draft standards from SC13, and reviewed by ACE/67, have been approved and passed on for issue as BSi Standards.

The standards now issued as BSi standards are as follows:

BS Z 1	Radio Metric and Orbit data
BS Z 2	Time Code Formats
BS Z 3	Telemetry Channel Coding
BS Z 4	SFDUs Structure and construction rules
BS Z 5	SFDUs Control authority procedures
BS Z 6	PVL specification
BS Z 7	ASCII encoded English
BS Z 8	Packet Telemetry
BS Z 9	AOS Network and data links
BS Z 10	SFDUs Control authority data structures
BS Z 11	Cross Support Reference Model SLE
BS Z 12	Telecommand Channel Service
BS Z 13	Telecommand Data Management Service
BS Z 14	Telecommand Command Operations procedures
BS Z 15	Telecommand Data Routing Service
BS Z 17	Data systems Lossless data compression
BS Z 18	Standard formatted data units Referencing environment
BS Z 19	Data description language EAST specification

The OAIS reference model has been circulated for comments as a draft BSi standard. The period for comments has just closed.

Technical Activities

Status of Action Items

There are no action items that currently apply.

Status of On-Going Assignments

The on-going assignment is to receive documents from the British Standards Institute and to ensure that it is reviewed for BSi and to then approve it (or not) for issuance as a British Standard. However, this is likely to change as indicated in the first section.

Status of Liaison Activities

The chair of ACE/67 (Peter Allan) attends meetings of ACE/68, which processes standards relating to space systems and operations. In addition, ACE/68 shadows the work of the European Co-operation for Space Standardization (ECSS) committees.

REPORT FROM THE UNITED STATES

U.S. Report to ISO/TC20/SC13

ISO/TC20/SC13 Meeting
Boulder, Colorado, USA

30 November 2000

*Adrian J. Hooke
Chairman, US Delegation
+1.818.354.3063
adrian.hooke@jpl.nasa.gov*

US Activities Since Last Meeting

- Conducted U.S. review of ISO CD 14721 (OAIS Reference Model) and fed-in comment from the International Council for Scientific and Technical Information as part of the US response. The US voted "Affirmative".
- The US Delegation continues to be very concerned that the International Traffic and Arms Regulation (ITAR) may severely limit our ability to function in the international standards arena. The question is whether a US organization can release anything that has a potential for military use even if in the public domain.
- We continue to actively pursue establishment of a national forum whereby NASA and the US military community can work together to assure that SC13 open standards are appropriately utilized in the context of interoperability across the US national space support infrastructure.
